

List of Approved Continuing Education Providers

These continuing education providers (listed alphabetically) have been pre-approved by ANCB. You can attend their seminars, workshops or classes and apply the credits towards fulfillment of ANCB's 20-hour requirement (in each two-year period). Many of these providers also offer on-line study options: simply complete their program (including the quiz or exam) and send documentation to ANCB.

Note: This list is not exhaustive. ANCB will consider other educational experiences on a case-by-case basis. If you have questions about a specific provider or program, please contact the ANCB office.
